

Making more from your urban green infrastructure goals

5th Nov 2026, Online half-day workshop

A half-day workshop supported by Natural Capital Initiative (NCI) & Society for the Environment

5th Nov 2026, Online half-day (morning) workshop

Led by Laurence Jones (UKCEH) & Meghna Das (SocEnv)

[Although online, we may restrict numbers to encourage more interaction, so please register using the link or QR code below, by Oct 16th]

About the Workshop

This workshop brings together councils, architects, housing bodies and innovators to explore how individual departmental goals can be aligned within a broader **green infrastructure** or **net zero** ambition. The session is designed to help participants identify shared priorities, uncover synergies, and co-create principles for an integrated approach that strengthen collaboration across departments and organisations.

The workshop is grounded in the idea that “things happen when people with a vision connect together,” enabling attendees to understand how their goals contribute to a bigger, collective ambition for improving liveability in towns and cities.

Agenda Summary

- Participants map their organisational goals and identify the departments and stakeholders needed to deliver shared priorities.
- Councils, architects and housing associations will share short case studies highlighting successful cross-departmental approaches.
- Groups will explore barriers, enablers and next steps, shaping guidance for future collaborative green infrastructure planning. Participants will be welcome to contribute to shaping that guidance in follow-up activities.

Who Should Attend

City councils, landscape architects, housing associations, NGOs and others working to enhance urban liveability and deliver integrated green infrastructure outcomes.
